

HP Exstream Dialogue 6.0 /6.1 Support Update

During the past few months, HP Exstream has received some requests to better align the previously announced Dialogue 6.0 or Dialogue 6.1 end of life date to business calendars. As a result, HP Exstream is moving the end of life date for Dialogue 6.0/6.1 from August 31, 2011 to **February 1, 2012**. This allows you to run your end of year applications running without moving to 7.0 or waiting for the 8.0 GA, currently targeted for August 2011.

Ongoing support and maintenance of Dialogue 6.0/6.1, and any related software components, will now reach end of life on **February 1, 2012**. Support cases for Dialogue 6.0/6.1 submitted to HP after this date will not be processed.

HP has professional services specialists with extensive experience in supporting our customers' software upgrades. They can assist in every step of the migration process from assessing and planning through applications migration, testing and production rollout. Please contact your HP Exstream Account Manager for more details.

The complete HP Exstream version support and obsolescence policy can be found in the HP Exstream Support Guide located on the [HP Exstream Support site](#).

If you have additional questions, please contact your HP Account Team or HP Exstream Support, who will be pleased to assist you. Alternatively, please visit www.hpexstream.com for general product information.
