# HP ECO SOLUTIONS PRINT CONSOLE

HPeco**SOLUTIONS**

Easily set your printer so you can save energy, paper, and supplies, using the HP Eco Solutions Print Console on your computer's desktop.

Do you frequently print documents and wonder how your printer settings are impacting both the environment and your printing costs? An industry first, the HP Eco Solutions Print Console provides a centralized tool that helps you easily make sound environmental printing choices.

One tool sets your printer's energy and paper-saving preferences

Gain access to all of your printer's environmental settings in one location. Select the energy, paper, and supplies settings that meet your printing needs while saving money and resources.

The HP Eco Solutions Print Console helps you reduce energy consumption and cut costs by setting up a reminder to turn the printer off at night. Reduce paper consumption by setting up default two-sided printing, and further conserve resources by automatically printing multiple pages on each side of the paper. To save toner, choose EconoMode for draft quality printing.

Instant feedback on reducing your carbon footprint

Understand how your choices conserve the world's resources and save you money. The HP Eco Solutions Print Console automatically estimates how much money, energy, paper, toner, and carbon dioxide emissions you can save annually. In addition, you can instantly see how changes you make are equivalent to reducing emissions or diverting waste from landfills.

How to get started

Visit www.hp.com/go/printconsole for a free download of the HP Eco Solutions Print Console and start making your print experience good for the office and good for the planet!

HIT **PRINT** **RESPONSIBLY**

The tools you need to make SOUND ENVIRONMENTAL printing choices.

The HP Eco Solutions Print Console provides links to a variety of tools to give you even more control over your environmental printing choices. By clicking the **Online Eco Solutions** tab, you can quickly access information about reducing your carbon footprint, recycling print cartridges though HP Planet Partners, shopping for HP supplies and paper—including recycled paper—and more.

Additional tools to help minimize your carbon footprint

With the free web-based **HP Carbon Footprint Calculator**, it's easy to see how you can reduce the environmental impact—and costs—of computing and printing. In just a few clicks, estimate how applying power-saving technologies, upgrading to more efficient features, and consolidating devices can lower your energy use and carbon footprint. You can review a single product, compare products, or evaluate an entire fleet, helping you make choices that are good for you, your business, and the planet.

Simple print cartridge recycling

Find more information about the **HP Planet Partners** program, which offers recycling and convenient return options for used HP print cartridges, and is available in 49 countries and territories around the world.[1] HP print cartridges returned to HP through Planet Partners go through a multiphase recycling process. Cartridges and components are either recovered or reduced to raw materials, which can then be used to make metal and plastic products such as HP cartridges, auto parts, roof tiles and other everyday products. Any remaining material is handled responsibly through energy recovery.

Smart ways to save paper

HP Print View Software is a suite of tools that helps you to create and print professional-quality brochures, fliers, mailers, and much more, using your own HP printer. It combines the capabilities of a print driver with a real-time print-preview of your document, unlike any other preview tool. You can change various print settings and see immediately how those changes affect your document. When you are satisfied with the print settings, you can print the job directly from HP Print View to your supported printer. Viewing how your document will look without printing test copies helps to reduce paper waste and saves money.

For printing from the web, use **HP Smart Web Printing**. Select, store, and organize text and graphics from multiple web pages and then edit and print exactly what you see onscreen. The tool also automatically fixes right-edge clipping, a common problem when printing web pages. HP Smart Web Printing gives you the control you need for printing meaningful information while minimizing waste. The HP Eco Solutions Print Console provides a link to download these free tools.

HP Eco Solutions Print Console system requirements

- 20 MB of available disk space
- .NET Framework 3.5 SP1
