

HP Applications Transformation to Cloud Services Increase Flexibility and Speed Delivery

PALO ALTO, Calif., April 12, 2011 – HP Enterprise Services today announced a new service to help enterprises assess and transform their legacy applications using cloud-based models.

The new [HP Applications Transformation to Cloud](#) services help enterprises analyze their application and infrastructure environments to determine cloud suitability and develop a customized roadmap that details how to transform and ultimately deliver it via the cloud.

The HP Applications Transformation to Cloud services help enterprises accelerate value from cloud computing by combining HP's deep heterogeneous technology expertise, as well as the company's proven applications rationalization and modernization practices and tools. For example, the new HP Cloud Applications Advisory Tool analyzes applications for cloud suitability based on 32 scoring characteristics. The HP Blueprint Method integrates tools and templates throughout the phases of a technology engagement to facilitate a high-quality, efficient execution of the transformation.

Through these services, clients get access to tools, experience and technology that improves accuracy, speeds assessment and reduces risks for both the project and the enterprise.

"Legacy infrastructure and applications stifle innovation as they are not properly sourced to meet rapidly changing demands," said Kathy Garcia, senior vice president, Applications Services, HP Enterprise Services. "To increase flexibility and speed time to market, HP draws on its deep legacy expertise combined with an understanding of the latest technologies and sourcing options to select the right method of delivery for the client."

HP Applications Transformation to Cloud services are available worldwide. More information is available at

This news advisory contains forward-looking statements that involve risks, uncertainties and assumptions. If such risks or uncertainties materialize or such assumptions prove incorrect, the results of HP and its consolidated subsidiaries could differ materially from those expressed or implied by such forward-looking statements and assumptions. All statements other than statements of historical fact are statements that could be deemed forward-looking statements, including but not limited to statements of the plans, strategies and objectives of management for future operations; any statements concerning expected development, performance or market share relating to products and services; any statements regarding anticipated operational and financial results; any statements of expectation or belief; and any statements of assumptions underlying any of the foregoing. Risks, uncertainties and assumptions include macroeconomic and geopolitical trends and events; the competitive pressures faced by HP's businesses; the development and transition of new products and services (and the enhancement of existing products and services) to meet customer needs and respond to emerging technological trends; the execution and performance of contracts by HP and its customers, suppliers and partners; the achievement of expected operational and financial results; and other risks that are described in HP's Quarterly Report on Form 10-Q for the fiscal quarter ended January 31, 2011 and HP's other filings with the Securities and Exchange Commission, including but not limited to HP's Annual Report on Form 10-K for the fiscal year ended October 31, 2010. HP assumes no obligation and does not intend to update these forward-looking statements.
