

CD labels and inserts instructions:

For best results, use Avery® 8931 CD/DVD Label Kit.

CD LABELS

1. Edit the CD label onscreen before printing. Simply type your information into the space provided. Or, if you prefer to hand write your label, highlight and delete the sample text.
2. Print the label onto a labels sheet. Set it aside to dry completely.
3. Peel the label from the sheet, and carefully attach it to the CD/DVD.

CD INSERTS

1. Edit the cover and inlay onscreen before printing. Simply type your information into the space provided. Or, if you prefer to hand write your information, highlight and delete the sample text.
2. Print the CD inserts onto the insert paper. Set it aside to dry completely.
3. Gently fold the paper along the perforation to remove the label from the sheet.
4. Bend the sides of the CD inserts along the fold lines.
5. Place the CD inserts inside the jewel case.

Note: make sure you're printing the labels on the label paper (pages 2 to 2 on your print set-up) and the inserts on the insert paper (page 3 to 4 on your print set-up). Always make a test print with regular paper to be on the safe side!
