Paul Benning

HP Senior Fellow and Chief Technologist,
3D Print HP Inc.

Paul Benning is the Chief Technologist for HP 3D Printing, the newest and fastest growing of HP's three global business units. Paul is an HP Senior Fellow and is recognized for his depth in MEMS, microfluidics and physical fundamentals. Previously, Paul held a series of positions in HP's ~\$20B Print business including core technology development and new business investigations with his most recent role being Chief Technologist for Print. Paul works inside HP and with external partners to discover, invent and develop technologies to make life better for everyone, everywhere.

Paul has been with HP since 1995. He holds over 35 patents and trade secrets and has authored over 35 publications in fields ranging from microfluidics and 3D printing to Inkjet algorithms and quantum dot devices. He holds a B.S. in Physics and a Ph.D. in Chemical Engineering and Materials Science.
