Contact information (email): cvaa.vpat.support@poly.com

Notes: This VPAT describes accessibility of the listed headsets as an accessory for use with ICT products.

Evaluation methods used:

We performed user validation through traditional human factors testing on EB1 samples and obtained positive user feedback. This testing didn't specifically include participants with disabilities. This is because the BW8225 product was developed before the official merger of Plantronics and Polycom (July 2018), which is the trigger point for the CVAA deliverable for products such as the BW8225.

We're taking steps to improve our test subject pool and include people with disabilities in our user validation testing for this product. However, the ongoing Covid-19 pandemic has presented significant challenges to locate and adequately test this target audience due to safety concerns. In addition, company policy requires that our employees refrain from meeting in-person for any activity unless deemed critical, and with safety precautions met. We're continuing to work safely and creatively within Covid-19 restrictions to address the CVAA requirement.
