HP Chrome Device Enrollment Service

Powered by Zero-Touch Enrollment[1,2]

Providing deployment efficiencies for businesses using HP Chromebooks.

Ready out of the box

Devices ship from the factory already enrolled in your domain, eliminating the need for IT to enroll devices before giving to the user.
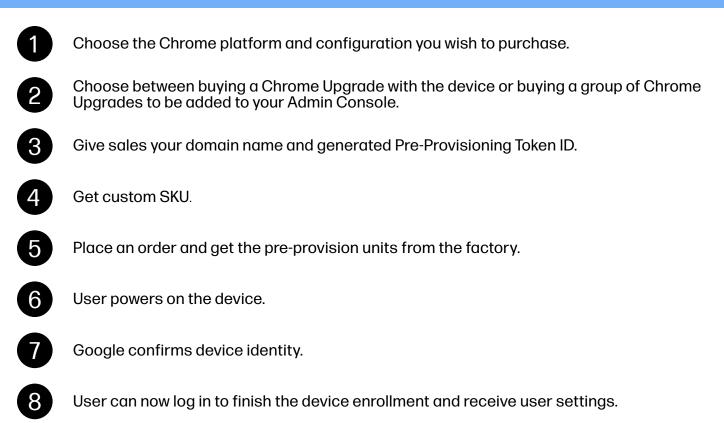

Built with security in mind

Hardware-backed verification secures the identity of the device to prevent spoofing attacks.

The Zero-Touch Enrollment Customer Journey

Factory setup

1 Choose the Chrome platform and configuration you wish to purchase.

2 Choose between buying a Chrome Upgrade with the device or buying a group of Chrome Upgrades to be added to your Admin Console.

3 Give sales your domain name and generated Pre-Provisioning Token ID.

4 Get custom SKU.

5 Place an order and get the pre-provision units from the factory.

6 User powers on the device.

7 Google confirms device identity.

8 User can now log in to finish the device enrollment and receive user settings.

All HP commercial Chromebooks are compatible with zero-touch enrollment.
